## DETAILED ACTION

### *Election/Restrictions*

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 84-103 and 109-113, drawn to a method of untangling, shortening, and opening nanotubes, classified in class 423, subclass 447.1.
- II. Claims 104-108, drawn to a method of closing nanotubes, classified in class 264, subclass 109.
- III. Claims 114-124, drawn to a method of coating nanotubes, classified in class 427, subclass 112.
- IV. Claims 125-133, drawn to a method of end-derivatizing or introducing an endohedral group to nanotubes, classified in class 423, subclass 460.
- V. Claims 134-140, drawn to a method of fractionating nanotubes by different properties, classified in class 423, subclass 461.

The inventions are distinct, each from the other because of the following reasons:

Inventions I through V are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different functions.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Art Unit: 1754
